Description

mi-50 bp DNA Marker Go consists of 10 DNA fragments ranging from 50 bp to 500 bp and is supplied in a ready-to-use format containing an orange tracking dye. The marker is ideal for size determination of double stranded DNA fragments on agarose gels, generated by PCR or restriction digest.

DNA log scale ladders are well suited for combination if small and large fragments should be analyzed on one gel.

DNA Fragments and their approx. quantity

50, 100, 150, 200, **250**, 300, 350, 400, 450, 500 bp
{10 or **15** ng/ µl}

The marker is supplied in a ready-to-use mix at a concentration of 0.105 µg/ µl.

For the best result load 5 µl of marker per lane.
