

## mb-rubber cow Burgl

Cat.-No.

mb-rcBurgl

### Description

The reasons for metabionimals' dedication to cows are manifold. Fact is, that our love for cows is very obviously shared by so many people around the globe, that we decided to gradually translate some of our "in silico" designed ruminating mascots into "real" and touchable toys/gimmicks.

We are going to start with a pair of Alpine cows representing the beautiful home of metabionimals – Bavaria/Germany! Charming Burgl is the female part of the "Bavarian Couple", who pioneer a special herd of cattle to be formed over time – mad cow disease free for sure. Each and every new member shall be hand-picked and qualified to become a delightful collectible for young and old, big and small alike.

Our little friend is manufactured from purely natural and biodegradable materials: natural rubber, no plasticizers or other doubtful additives. Burgl is produced in Europe, is non-toxic and conforms to the European Standards for children's toys EN71/1/2/3 (suitable for kids under the age of 3).

metabionimals rubber cows are handmade of natural rubber – completely free from PVC, BPA, Phtalates and Nitrosamines -, and hand-painted with non-toxic lead free paints. Its bright colors equally appeal to kids and adults, and their soft, flexible, lightweight texture makes it easy for tiny and big hands to grasp and handle. Burgl is water-resistant, babies (and adults) can chew on her without compunction.
