PPWR Statement

Dear Valued Customer,

Thank you for your inquiry regarding the Packaging and Packaging Waste Regulation (PPWR), Regulation (EU) 2025/40.

metabion International AG acknowledges its responsibilities regarding product compliance, regulatory affairs, and product stewardship. We remain committed to monitoring applicable regulations, assessing their potential impact, and addressing relevant obligations diligently and in a timely manner.
metabion International AG supports the European Union's objectives of reducing packaging waste and promoting a circular economy for packaging. The PPWR harmonizes and updates many existing EU packaging requirements while introducing additional obligations that will become applicable according to phased implementation timelines.

Certain requirements are still dependent on secondary legislation, harmonized standards, or technical methodologies that have not yet been finalized. Consequently, confirmation of compliance with specific PPWR requirements must take into account the applicable legal dates and the availability of finalized regulatory criteria.

We are currently reviewing our relevant packaging and packaged product portfolios, supplier information, and supporting technical documentation. Where a Declaration of Conformity is required, metabion International AG intends to make the applicable declarations available in accordance with the PPWR's general application date of 12 August 2026.

Requests for additional information, including recycled content, recyclability, packaging composition, and other sustainability-related data, will be addressed in line with the relevant implementation timelines.

R. Bichlmaier
